

DEVELOPMENTAL ASSESSMENT CLINIC

Coming
December
& January!

Do you have concerns about your child's development
(speech, learning, motor or social emotional)
Are you worried about your child's readiness for Prep?

We have developed a Developmental Assessment clinic to help you advocate for appropriate supports for your child.

Our Developmental Assessment Clinic was established to provide an initial assessment in order to identify potential developmental delays in children under 6 years old. Families who are assessed as eligible will be assisted in applying for NDIS Early Intervention funding with the intention of further comprehensive assessment when approved.
